

Bubbl

INTERNSHIP OPPORTUNITIES

Location: DC / NYC
Hours: Part-Time + Full-Time
Company:

Bubbl is creating a mobile app that lets friends capture the best parts of online videos. With so many video links shared daily, no one has time to watch everything or to wade through the litter blasted on social networks to find what really matters.

This is just the first step in a much bigger vision to empower the transformative use of digital content.

Our company is well established and growing rapidly. We have raised two seed rounds, and are on track to raise our Series A financing in 2014. We are proudly accelerated out of the 1776 Campus in downtown DC, where you'll be provided a membership. We spend our days working with leaders in the entrepreneurship, media, and tech industry – this is a great opportunity for students looking for exposure to this world.

Our team is made of veteran entrepreneurs. Our CEO, who graduated from Georgetown Law and Stanford GSB, has a successful production company and web marketplace under his belt. Our COO is from the film industry, and co-founded that marketplace and innovated systems for audience-dependent alternate theatrical programming. Our VP of Design is from AOL, and sold his last startup to Microsoft.
